Experience

Founder's Office – Product & Tech Manager Oct 2025 – Present
Humann Healthtech Global Solutions Pvt. Ltd., Hyderabad, India

- Owned the product lifecycle as the **sole Product Manager**, from discovery and prioritisation to roadmaps, PRDs, Figma flows and Jira; ran sprint planning, QA and UAT with an outsourced engineering team.
- Launched the NRI Therapist Matching System **from 0 to 1** (weighted matching, country-specific pricing); a 45-day paid pilot converted **20% of discovery calls** into paying clients.
- Replaced manual WhatsApp scheduling with an **internal CRM** and self-serve booking flow integrating availability, payments and automated Google Meet links, cutting booking time from 15–20 minutes to **under 2 minutes**.
- Led the migration from **Agora SDK to Google Meet** after **65% of calls dropped**, redesigning the session-join flow and validating it across Android and iOS; **zero call drops** since launch.
- Used GA4, Mixpanel and Clarity funnels and **A/B tests** to guide a booking-flow redesign; repeat bookings reached **95%** (NRI) and **90%** (India) across 300+ sessions.
- Presented the **AI assistant's architecture** (RAG, safety detection, therapist handoff) to the founder and lead psychologists; from their feedback, replaced the fixed handoff after 4–5 messages with **readiness-based timing**, as users needed minutes to days.
- Built university partnerships with **King's College London and SOAS** and led the SOAS Campus Ambassador pilot.

Founder's Office – Growth & Operations Intern Jul – Sept 2025
Humann Healthtech Global Solutions Pvt. Ltd., Hyderabad, India

- Launched Humann Reset, an **INR 999 trial-session experiment**, to test price sensitivity in first-time therapy bookings; identified **hesitation to commit to therapy, rather than pricing**, as the primary adoption barrier.
- Grew the marketplace from **0 to 25+ active users** and Instagram from 300 to **2,000+ followers (6x)** through therapist onboarding, social media strategy and community events.

Data Analyst Intern Jul – Sept 2024
CODTECH Software Solutions, Hyderabad, India

- Analysed student data using Python and SQL, developed **Power BI dashboards** that reduced manual reporting time by **40%**, and presented actionable findings to stakeholders.

AI/ML Intern Jul – Sept 2022
Cantilever Labs, Hyderabad, India

- Developed a **student performance prediction model** using Python, Pandas and Scikit-learn; evaluated **Random Forest and XGBoost**, presented findings to stakeholders, explored **NLP-based essay grading**, and built a **computer vision emoji-detection** project.

Projects

Humann AI – *Conversational Support Assistant* **Visit**

- Built a conversational AI assistant to help users overcome hesitation around seeking therapy, implementing safety detection, recurring-theme identification, guided exercises and therapist handoff.
- Engineered a **RAG pipeline** using Node.js/Express, **OpenAI API** and a vector database, grounded in **50+ psychologist-reviewed documents** (500+ chunks, top 3–5 retrieved per query); evaluated the assistant against its original version across **100+ safety and edge-case scenarios** with the founder and psychologists.

Master's Compass – *Product Strategy & Development* **Visit**

- Iterated a master's application planner through **18 documented versions**, evolving it from a university organiser into a deadline-driven **prioritisation tool** surfacing the next 3 actions; **12 users** added **20+ universities**.
- Implemented and emulator-tested Firestore security rules for user-level data isolation, instrumented **12 activation and retention events** in Microsoft Clarity, and paused feature development to evaluate 7-day user retention.

Education

Geethanjali College of Engineering and Technology, Hyderabad, India 2020 – 2024
B.Tech, Computer Science and Engineering

- **100% EAMCET scholarship** for all four years; Class Representative and Student Council Member for four years.

Skills

Product Management	Product Strategy, Product Discovery, User Research, Roadmaps, PRDs, Prioritisation, Agile, UAT
Technical & Analytics	SQL, Python, JavaScript, Node.js, React, OpenAI API, Machine Learning, RAG, Data Analysis
Tools	Figma, Jira, Git, GitHub, GA4, Mixpanel, Microsoft Clarity, Power BI, Notion
